Overview data quality dimensions

Data quality dimension

A

- Ability to represent null values
- Accessibility
- Accuracy
- Appropriateness
- Availability

C

- Clarity
- Coherence
- Comparability
- Completeness
- Compliance with laws, regulations, or standards
- Confidentiality
- Consistency
- Credibility
- Currency

E

- Equivalance

F

- Findability

G

- Granularity

I

- Integrity

L

- Latency
- Linkability

M

- Metadata compliance

N

- Naturalness

O

- Objectivity
- Obtainability

P

- Plausibility
- Portability
- Precision
- Punctuality

R

- Reasonabilty
- Recoverability

R cont.

- Redundancy
- Referential integrity
- Relevance
- Reliability
- Reproducibility
- Reputation
- Retention period

T

- Timeliness
- Traceability

U

- Uniqueness

V

- Validity
- Valuability
- Variety
- Volatility
