

# Data mart

## Definition

A data mart is a subset of data from a [data lake](#) or [data warehouse](#), tailored to the needs of a specific department or team.

## Note

A data mart makes it easy to access and analyse the data needed, without having to sift through all of the data in the [data lake](#) or [data warehouse](#).

## Relation

Data mart	is subset of	<a href="#">data lake</a>
Data mart	is subset of	<a href="#">data warehouse</a>
