Comparability

Definitions

Comparability of data values **over populations** is the degree to which data values respresenting two or more populations have the same definition and are measured in the same way.

Comparability of data values **over time** is the degree to which data values over time have the same definition and are measured in the same way.

Relations

Comparability	is a characteristic of	data values

Examples

- Comparability of sales figures in different areas.
- Comparability of sales figures over the years.
