

Currency

Definition

Currency is the degree to which [data values](#) are up to date.

Note

The cause of lack of currency is, that [data values](#) have not been updated in time.

Relation

- Currency is a [characteristic](#) of [data values](#).
- If a data value is not current, then it is also not [accurate](#).

Example

Old address

Employee name	Place of living
John Steward	Washington

John has moved meanwhile to New York.
