

Integrity

Definition

Integrity of data values is the degree of absence of loss or corruption of [data values](#).

Relation

- Integrity is a [characteristic](#) of [data value](#).
- Integrity is one of the three aspects of data security next to [confidentiality](#) and [accessibility](#) (CIA).
- Integrity can also be regarded as a characteristic of software and hardware (infrastructure), which is relevant in the context of data security.

Example(s)

A hacker or a technical problem can decrease the integrity of data by deleting, changing or damaging data.
