

# Integrity

## Definition

Integrity of data values is the degree of absence, loss or corruption of [data values](#).

## Relations

Integrity	is a <a href="#">characteristic</a> of	<a href="#">data value</a>
Integrity	is one of the three aspects of	data security

- Other aspects of data security are [confidentiality](#) and [accessibility](#) (CIA).
- Integrity can also be regarded as a [characteristic](#) of software and hardware (infrastructure), which is relevant in the context of data security.

## Example

A hacker or a technical problem can decrease the integrity of data by deleting, changing or damaging data.
