

Referential integrity

Definition

Referential integrity of data files is the degree to which [data values](#) of the [primary key](#) of one [data file](#) and data values of the [foreign key](#) of another [data file](#) are equal.

Relations

Referential integrity	is a characteristic of a data file in relation to another data file
-----------------------	---

Example(s)

98% of the employee records pointed to a department record.
