

# Relevance

## Definition

Relevance of a [composition of a dataset](#) is the degree to which the [composition of a dataset](#) meets the needs of [data users](#).

## Synonym

Usability

## Relation(s)

Relevance	is a <a href="#">characteristic</a> of the <a href="#">composition of a dataset</a>
-----------	---

## Example

The order file is not relevant because it doesn't regard the right period in time.
