

Timeliness

Definition

Timeliness of data availability is the degree to which the period between the time of creation of the [real value](#) and the time that the [dataset is available](#) is appropriate.

Note

Note the difference with [punctuality](#) which refers to a planned point in time of delivery.

Relation

Timeliness is a characteristic of the availability of a dataset

Example(s)

The annual report over 2022 became available at 15 January 2023. The timeliness of the report was more than appropriate.
