Data quality management system	consists of element	<a href="#">management review</a>
Data quality management system	consists of element	<a href="#">metadata</a>
Data quality management system	consists of element	<a href="#">roles and responsibilities</a>
Data quality management system	consists of element	<a href="#">stakeholder analysis</a>

**Lifecycle**

- Plan DQMS
- Create DQMS
- Develop DQMS
- Establish DQMS
- Implement DQMS
- Apply DQMS
- Maintain DQMS
- Audit DQMS
- Improve DQMS
- Abolish DQMS

**Characteristics**

- Effectiveness of a DQMS
- Efficiency of a DQMS

**Implementation**

The [OGSM-model](#) can be used to implement DQSM. Through this model, objectives, goals and strategies can be turned into actions.
