

Data model

Definition

Data model is the description of the organisation of data in a manner that reflects an information structure (ISO 11179:1999)

DMBoK2

A data model describes an organization’s data as the organization understands it, or as the organization wants it to be.

Notes

Data models may be conceptual, logical, or technical.

Relation

Data model	is child of	description
Data model	is part of	metadata

Reference

ISO 11179:1999. Information technology — Metadata registries (MDR) — Part 1: Framework.
