

Data model

Definition

Data model is the description of the organisation of data in a manner that reflects an information structure (ISO 11179:1999)

DMBoK2

A data [model](#) describes an organization's data as the organization understands it, or as the organization wants it to be.

Notes

Data models may be conceptual, logical, or technical.

Relation

| | | |
|------------|--------------|-------------------------------|
| Data model | is child of | model |
| Data model | is part of | metadata |
| Data model | is result of | data modeling |
