Data management

Definition

Data management is management with regard to data.
Notes

Another definition of data management is: the development, execution, and supervision of plans, policies, programs, and practices that deliver, control, protect, and enhance the value of data and information assets throughout their lifecycles (DMBOK, 2017).

The term data management is an umbrella term for any activity that has to do with managing data as an asset.

Relations

Data management	is supertype of	data management system
Data management	consists of knowledge areas	data governance
Data management	consists of knowledge areas	data modeling & design
