

# Risk

## Definition

Risk is the [effect](#) of uncertainty on [objectives](#).

## Notes

- Risk is usually expressed in terms of
  - Risk sources
  - Potential events
  - Their consequences
  - Their likelihood

## Example

[Objective](#) is that 95% of the telephone numbers in de customer file are [valid](#). However, the front-end application doesn't check the [format](#) of the telephone number. Therefore, it is uncertain if the customer always properly completes their telephone number. The [effect](#) of this uncertainty can be, that the [objective](#) will not be met.
