

# Overview data quality dimensions

## A

- Ability to represent null values
- Accessibility
- Accuracy
- Appropriateness
- Availability

## C

- Clarity
- Coherence
- Comparability
- Completeness
- Compliance with laws, regulations, or standards
- Confidentiality
- Consistency
- Credibility
- Currency

## E

- Equivalence

## F

- Findability

## G

- Granularity

## I

- Integrity

## L

- Latency
- Linkability

## M

- Metadata compliance

## N

- Naturalness

## O

- [Objectivity](#)
- [Obtainability](#)

## P

- [Plausibility](#)
- [Portability](#)
- [Precision](#)
- [Punctuality](#)

## R

- [Reasonability](#)
- [Recoverability](#)

## R cont.

- [Redundancy](#)
- [Referential integrity](#)
- [Relevance](#)
- [Reliability](#)
- [Reproducibility](#)
- [Reputation](#)
- [Retention period](#)

## T

- [Timeliness](#)
- [Traceability](#)

## U

- [Uniqueness](#)

## V

- [Validity](#)
- [Valuability](#)
- [Variety](#)
- [Volatility](#)
