

Overview data quality dimensions

Data quality dimension

A

- Ability to represent null values
- Accessibility
- Accuracy
- Appropriateness
- Availability

C

- Clarity
- Coherence
- Comparability
- Completeness
- Compliance with laws, regulations, or standards
- Confidentiality
- Consistency
- Credibility
- Currency

E

- Equivalence

F

- Findability

G

- Granularity

I

- Integrity

L

- Latency
- Linkability

M

- Metadata compliance

N

- Naturalness

O

- [Objectivity](#)
- [Obtainability](#)

P

- [Plausibility](#)
- [Portability](#)
- [Precision](#)
- [Punctuality](#)

R

- [Reasonability](#)
- [Recoverability](#)

R cont.

- [Redundancy](#)
- [Referential integrity](#)
- [Relevance](#)
- [Reliability](#)
- [Reproducibility](#)
- [Reputation](#)
- [Retention period](#)

T

- [Timeliness](#)
- [Traceability](#)

U

- [Uniqueness](#)

V

- [Validity](#)
- [Valuability](#)
- [Variety](#)
- [Volatility](#)
