Data supplier

Definitions

A data supplier is a supplier of data.

Notes

A data supplier is an organization or business that provides and maintains data for aplying by third parties. A supplier can be internal or external to an organization.

Some of the data supplier responsibilities are:

- Providing data in accordance with the conditions agreed in the data delivery agreement. E.g., the supplier must deliver the required fields with the required quality.
- Adhering to the delivery of the data on the dates (and time) specified in the agreement.
- Delivering up-to-date data.

Relations

Data supplier	is child of	supplier
