

Data supplier

Definitions

A data supplier is a [supplier](#) of [data](#).

Notes

A data supplier is an organization or business that provides and maintains data for consumption by third parties. A supplier can be internal or external to an organization.[1]

Some of the data supplier responsibilities are:

- Providing data in accordance with the conditions agreed in the data delivery agreement. E.g., the supplier must deliver the required fields with the required quality.
- Adhering to the delivery of the data on the dates (and time) specified in the agreement.
- Delivering up-to-date data.

Relations

- Data supplier is subtype of [supplier](#).
- Data supplier is an instance of a [data management role](#).
- Data supplier is part of DQMS-element [roles and responsibilities](#)
